DETAILED ACTION

Response to Amendment

1. Applicant's amendments, filed 8/11/2005, have been fully considered and reviewed by the examiner. The examiner notes the amendments to the independent claims, the cancellation of claim 3, and the addition of new claim 26. Claims 1-2 and 4-26 remain pending.

Allowable Subject Matter

2. Claims 1-2 and 4-26 are allowed.

3. The following is an examiner's statement of reasons for allowance: None of the prior art cited or reviewed by the examiner teaches the method as claimed to restore the adjacent airfoil to airfoil throat distance such that the weight after the restoration is less than the weight before engine operation. In addition, none of the prior art cited or reviewed by the examiner reasonably suggests providing restoration without incurring a weight penalty. The closest prior art, US Patent 6049978 by Arnold, US Patent 5851409 by Schaeffer et al., and US Patent 5972424 by Draghi et al disclose reapplication of the thermal barrier plus bond coating after removal of a portion of the metal substrate, but the references do not reasonably teach or suggest alone or in combination that the final weight is less than the weight prior to engine operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
